

Wireless Convenience. Timeless Elegance.
Silent Gliss Battery-Operated Roller and
Roman Blind Systems.

Motor: Yes. Wires: No.

Today's architecture and interior design must continue to meet the highest aesthetic standards, offering maximum convenience and concealed technology. The Silent Gliss battery-operated roller and roman blind systems fulfil these requirements by offering wireless shading at the push of a button.

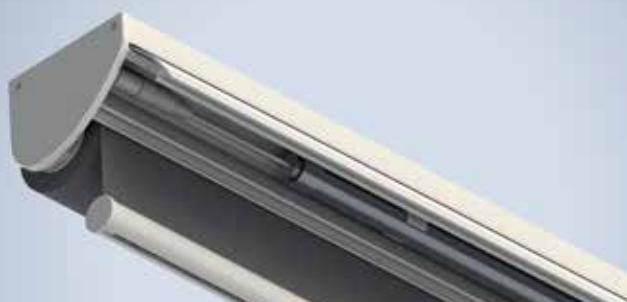

Retrofit installation.

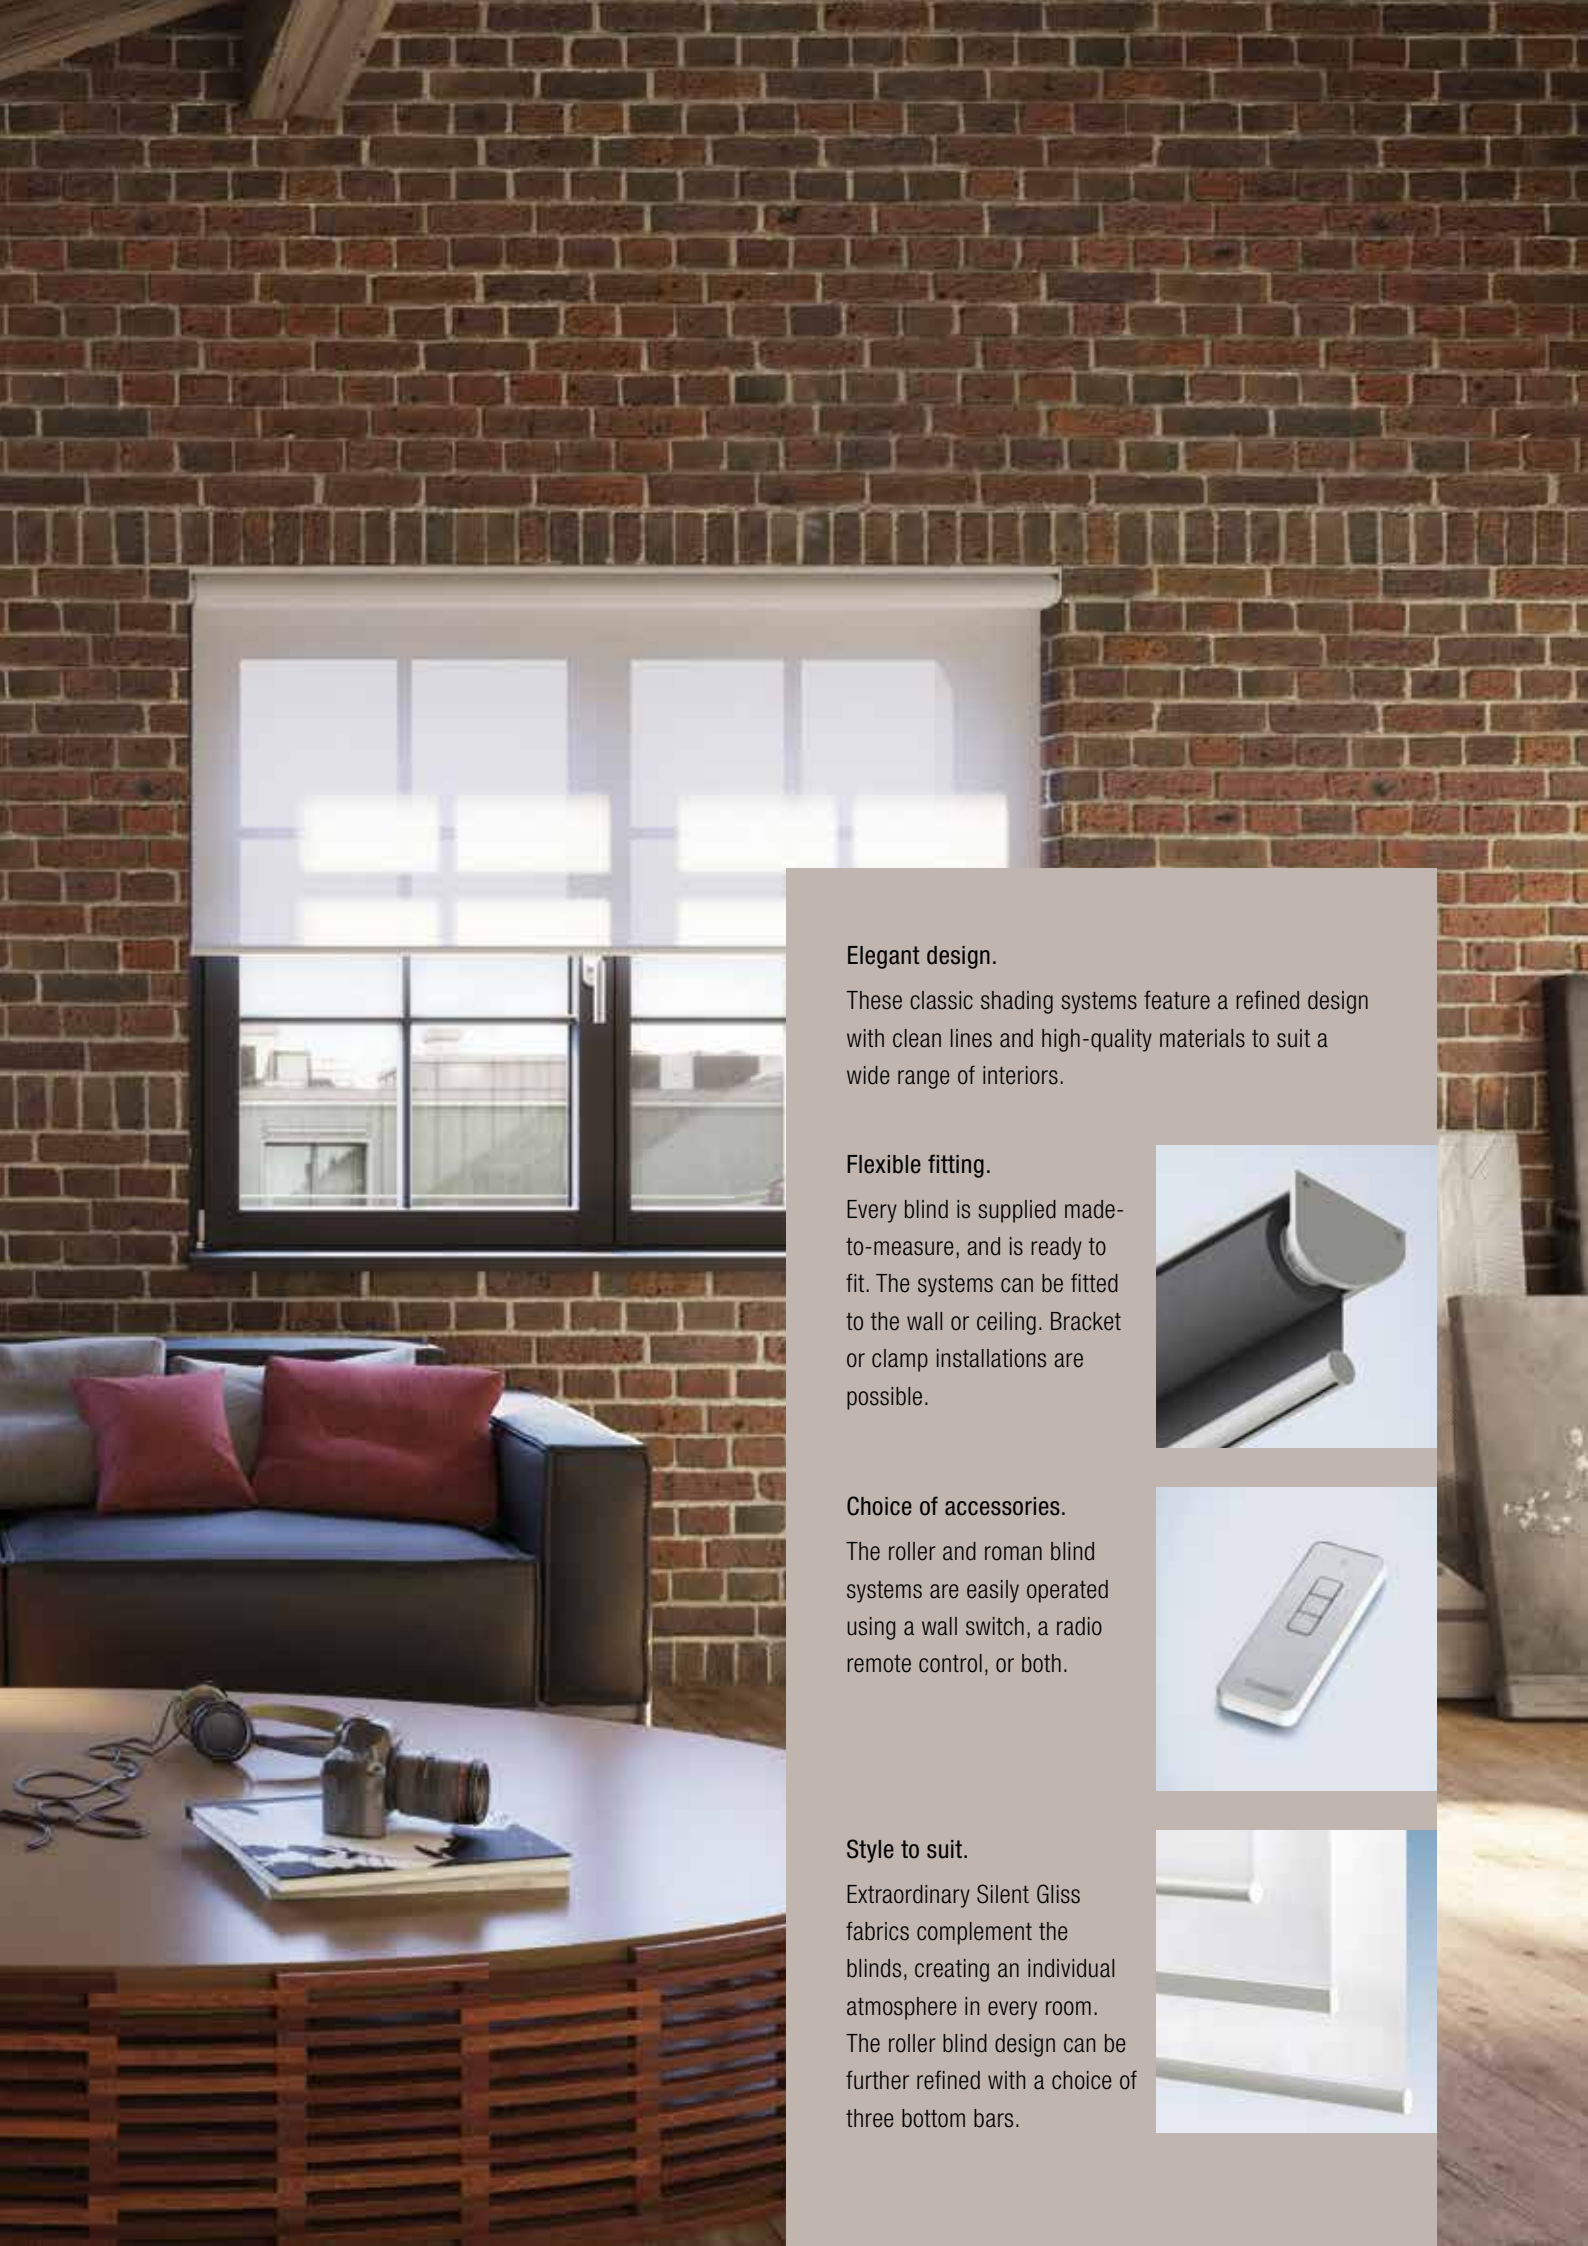

In many situations, hard wiring to a window is not possible. Silent Gliss battery-operated blinds are wireless, making them the ideal retrofit solution.

Function Meets Design.

Easy battery replacement.

The battery-operated roller and roman blind systems use conventional batteries with a service life of up to three years. The batteries are contained within an easily accessible holder to allow a fast battery exchange when required.

Elegant design.

These classic shading systems feature a refined design with clean lines and high-quality materials to suit a wide range of interiors.

Flexible fitting.

Every blind is supplied made-to-measure, and is ready to fit. The systems can be fitted to the wall or ceiling. Bracket or clamp installations are possible.

Choice of accessories.

The roller and roman blind systems are easily operated using a wall switch, a radio remote control, or both.

Style to suit.

Extraordinary Silent Gliss fabrics complement the blinds, creating an individual atmosphere in every room. The roller blind design can be further refined with a choice of three bottom bars.

Silent Gliss is the leading global supplier of motorized and manual curtain and blind systems in the high quality market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation – inspired and driven by customer needs.
