

Metropole Decorative Curtain Poles

30mm | Black | Fused Barrel Colour Matched

For full range refer to charts in the back section

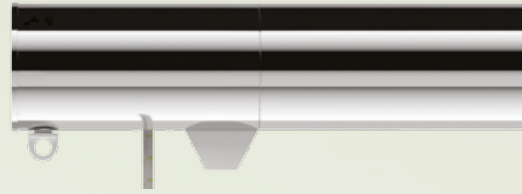

A Decorative Curtain Pole ... That Functions Like a Track!

Metropole is actually a curtain track and does not need curtains rings, the curtains hang directly on nylon gliders contained in a channel inside the pole.

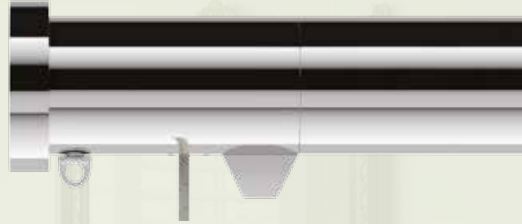

However, unlike traditional curtain poles, the brackets attach to the top of the pole allowing the curtain to move smoothly throughout the complete length of the pole – no need for passing brackets, making it perfect for wide windows and large expanses of glass.

Simple but Stylish

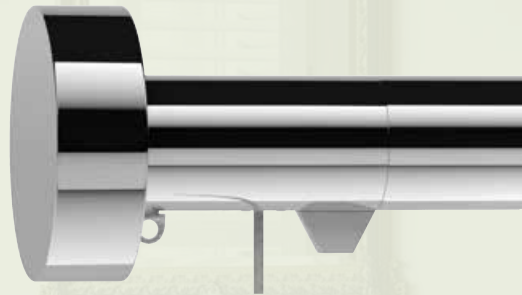

For a minimalist look, or for restricted spaces, Metropole can be selected with a Flush, Stud or Design Endcap.

Hand, Cord or Electric Operation

Metropole can be hand, cord or electrically operated. Whichever method is chosen, there is the same smooth and unhindered curtain movement.

All our poles, regardless of size, shape or operation, keep the same sleek design. The cording endset blends into the pole profile giving a seamless finish.

Hand operated profile

Cord operated profile

Child safety – a cord retainer is supplied with all cord operated tracks.

Electric Operation

The easiest operation method! Metropole is designed so that the motor is hidden discreetly behind the curtain.

Bay Windows

Unlike wood poles, Metropole can easily be bent to fit perfectly to bay windows or other curved applications. Made to measure, Metropole is tailored exactly to the contours of your window.

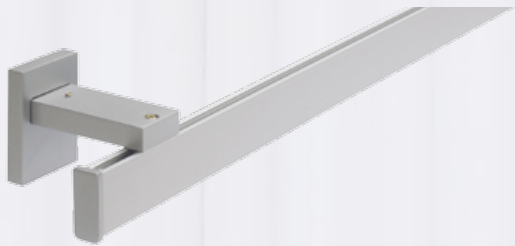

36mm Metroflat – the Contemporary Profile

Metroflat is a flat curtain pole offering a contemporary alternative to traditional round poles. With or without finials, available in 8 popular colours, it's perfect for modern interior design schemes.

Attention to Detail

Silent Gliss Metropole considers all the detailed elements of the curtain pole system. Brackets are colour matched to the pole.

Larger, Wider Curtains

For larger, heavier curtains or where individual curtain operation is wanted. Corded systems can be restrictive. Metropole can be manufactured with an Intermediate Pulley where the pole is corded at both ends offering much more flexibility in weight and operation.

30mm | Antique Bronze | Frosted Ball

50mm Metropole

Larger windows or high ceilings often lend themselves to larger diameter poles. Metropole is available in a 50mm diameter pole with a wide range of finials and can be bent for bay windows.

Metropole with Wave — a Perfect Partnership

Metropole can be supplied with Silent Gliss Wave Curtain Heading System. This contemporary alternative to traditional pinch pleat and goblet style headings has revolutionised the perception of curtains in modern interiors.

For more information on Wave please refer to the Silent Gliss Wave Brochure.

Silent Gliss Fabric Collection

Whilst many fabrics are suitable for Wave, only when using Silent Gliss approved Wave fabrics can you be assured the perfect and even wave affect. By selecting one of our wider fabrics and limiting the number of joins, the highest quality curtain is achieved.

All fabrics for Wave are Oeko-Tex certified and fire retardant. Silent Gliss provides solar, heat and acoustic coefficients to help select fabrics which preferably manage light, glare and heat control in a room.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatment systems.

With cutting edge technology and a relentless commitment to precision, we develop and manufacture the world's quietest, smoothest-gliding curtains and blinds.

Driven by our customers' needs, Silent Gliss provides bespoke curtain and blind systems complemented by expert technical advice, installation and support services. Silent Gliss stands for innovative solutions, exceptional design and outstanding quality. Swiss engineered since 1952.
